DETAILED ACTION

Specification

1. The abstract filed December 18, 2003 has been received and is approved by Examiner.

Allowable Subject Matter

2. Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: As the claims were read and interpreted in light of the specification, the prior art of record fails to specifically disclose a surface mode liquid crystal device comprising a layer of nematic crystal having, in particular, viscosity coefficients η_1 , η_2 , and γ_1 that satisfy $(\eta_1 - \eta_2)/\gamma_1 \geq 1.15$ or $(\eta_1 - \eta_2)/\gamma_1 \leq 0.9$ at a temperature such that the liquid crystal is at least 5C away from a transistion to another phase, where η_1 refers to a director parallel to velocity gradient, η_2 refers to a director parallel to flow direction, and γ_1 refers to rotational viscocity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
